

Remarks

Claims 1-41 are pending in this Application.

In order to focus prosecution of the current case, Applicant is canceling previously pending claims and adding new ones directed to a method comprising contacting cells using polypeptides disclosed in the present application. In the present Preliminary Amendment, claims 1-41 have been cancelled. New methods claims 42-49 have been added. The polypeptides recited in claims 42-49 were described in the specification as originally filed and had been recited in the now canceled claims. Support for a method of contacting such polypeptides with cells can be found throughout the Examples 7-12 of the specification as originally filed. Applicant therefore submits that no new matter is introduced by these amendments.

Respectfully submitted,

Dated January 24, 2008
